[PDR ABOUT OUR DATA SOURCES](#)  
[PDR ABOUT OUR DATA SOURCES](#)  
[PDR ABOUT OUR DATA SOURCES](#)

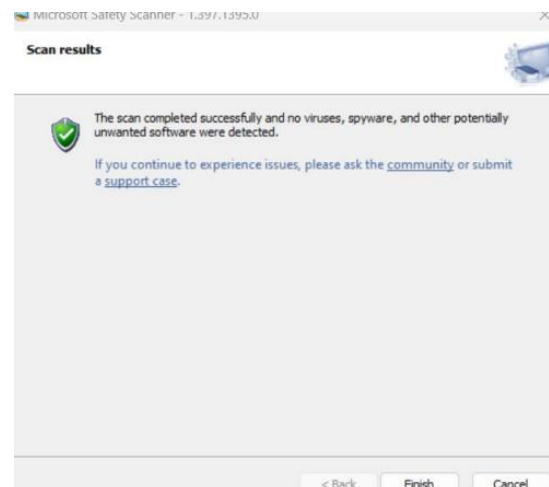

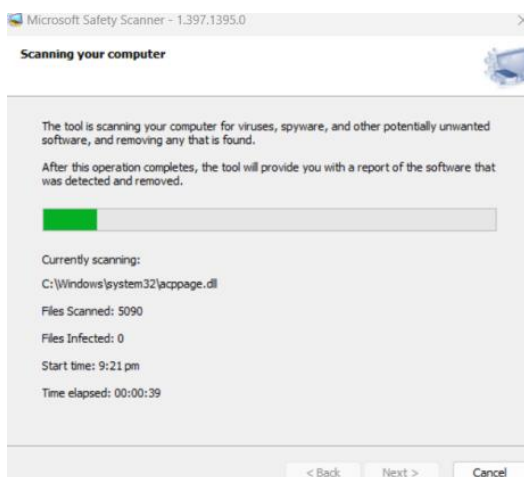

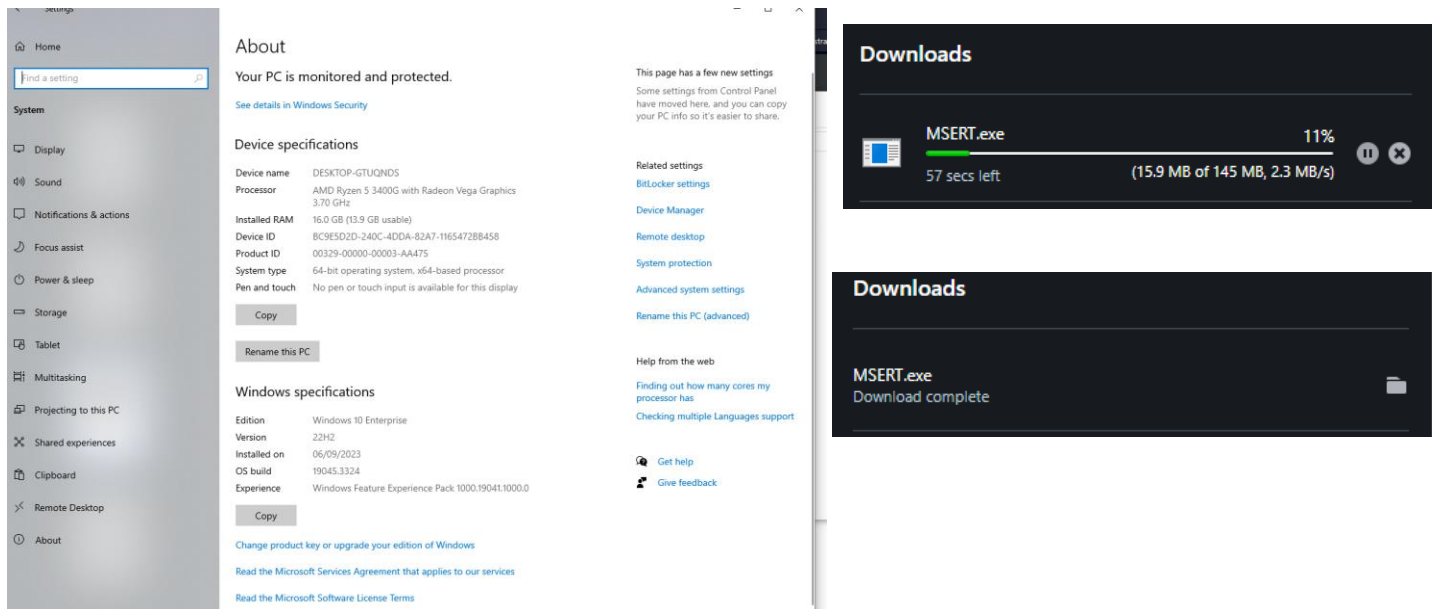

\* Note: The data breaches displayed here were collected by PDR, primarily from U.S. attorney general and the Department of Health and Human Services, and includes data breaches that have been reported until February 1, 2022. It does not represent an alphabetical list of all breaches and is not meant to be a complete list. This list is designed for informational purposes only. For more information, including instructions for our search for categories, go to <https://www.privacyrights.org>. You can find out more information about data breach reports [here](#).

[illegible]

1. How many breaches that were made public pertain to educational institutions?  
- 1,418
2. How many breaches that were made public pertain to this type?  
- 77
3. What are the important insights you learn from the output.  
- Data breaches are a growing problem, and it is important to be aware of the risks. You can protect yourself by being careful about what information you share online and by using strong passwords.

## II. Scan for Malware Using the Microsoft Safety Scanner

1. Explain what is the output of your Full Scan
  - The Microsoft Safety Scanner didn't find any malware on my device, which means that my device is likely safe from the most common types of cyber threats.
2. Is this tool helpful to scan for Malware? Discuss your answer.
  - The Microsoft Safety Scanner is a free tool that can help you find malware on your computer. It is easy to use, but it does not provide the same level of protection as an antivirus program. For best results, use the Microsoft Safety Scanner in conjunction with an antivirus program.
